UK Computing Summit 2025: Navigating change (surviving and beyond)

Session: Funding Opportunities PechaKucha incl. CPHC Special Projects Funding

Nicky Danino

Head of School of Computer Science
Leeds Trinity University
Read Nicky's full bio [here](#)

Nicky is a computer scientist, technology advocate, and seasoned science communicator. Recently listed as a 'Tech Women Celebration 50', she stands out as one of the few female Heads of School of Computer Science in the UK. As a highly regarded leader in Computer Science education, Nicky plays a prominent role in the UK's Computer Science community. Nicky's literary accomplishments further exemplify her dedication to merging science with popular culture.

With a deep-seated passion for elevating the presence and recognition of women in technology, Nicky has devoted her career to advocating for this cause. She champions the importance of digital skills, social media savvy, and technological literacy as tools for transformative change in our lives, society, and future. Her commitment to public engagement and science communication further cements her status as a leading voice in the field, dedicated to inspiring positive change and fostering a more inclusive technological landscape.
