UK Computing Summit 2025: Navigating change (surviving and beyond)

Session: Funding Opportunities PechaKucha incl. CPHC Special Projects Funding

Gabriela Czanner

Professor in Digital Health
University of Southampton

Gabriela Czanner is a Professor in Digital Health at the University of Southampton. Her research focuses on the development of AI and statistical methods toward decision support systems for healthcare as well as for understanding the biological processes in health and disease. Her projects are funded by EPSRC, Dunhill Medical Trust, MRC, NIHR, and GCRF, totalling £7.8 million. Her previous research was at the University of Liverpool, the University of Warwick, Liverpool John Moores University, the University of Oxford, the University of Pittsburgh, and the Massachusetts Institute of Technology. She has served in independent committees for UK clinical trials for AI validation, as an evaluator for the European Commission in digital health areas, and developed data science courses for the Royal College of Ophthalmology and the Royal Statistical Society.

Irina is passionate about combining project management with practical technology solutions, and enjoys working in both Agile and Waterfall environments. Her goal is to grow into a leadership role within digital change, and she is committed to learning, adapting, and making a meaningful impact in the sector.
